

EXPERIENCE

Networsys Technologies LLP

October 2025 – Present

Frontend Developer
Noida, India

- Developed scalable and high-performance web applications using React.js, focusing on reusable and maintainable components.
- Designed and implemented responsive UI interfaces ensuring cross-browser compatibility and accessibility.
- Created workflow designs and UI flow structures to improve team understanding and streamline development processes.
- Conducted client meetings for project clarification, ensuring clear requirement understanding and reducing development gaps.

Nettechnocrats IT Services Pvt. Ltd.

November 2023 – September 2025

Frontend Developer (with Project Management Responsibilities)
Noida, India

- Using the current frontend technology stack, I developed high-performance, responsive web applications that increased application speed and performance by 30%.
- Architected a modular and reusable component library using advanced state management, reducing frontend development time by 20% across all projects.
- Boosted application performance by 30% by implementing advanced optimization techniques including code-splitting, lazy loading, and image caching, significantly improving user experience scores.

Project Management Contributions:

- Used Asana, Trello, and MS Project to oversee the work of many frontend projects, ensuring 100% on-time delivery and precise tracking of deadlines, milestones, and task ownership.
- Refined client communication strategies and technical plans, leading to a 15% reduction in requirement-related bugs and ensuring clearer alignment between business needs and development teams.

Wezen Education Pvt. Ltd.

April 2022 – November 2023

Web Developer
New Delhi, India

- Led the redesign of 3 company websites, (Coluni Education, Classic IAS Academy, Classic Infra Services), resulting in a 25% decrease in bounce rate and a 15% increase in average session duration.
- Slashed average page load time by 40% (from 5.2s to 3.1s) by optimizing image assets, refactoring CSS, and restructuring the DOM for key company websites.

PROJECTS

SPATO – Multi-User Pool Cleaner Robot Platform

- Developed a scalable multi-role web application (B2B, B2C, Admin, User) using React.js with interconnected modules for product and order management, while integrating OpenCV-based image processing to extract numerical data from images, improving automation, performance, and overall operational efficiency through reusable components and optimized workflows.

PUEXP Logistics Management Admin Panel

- Developed a complete logistics management admin dashboard for PUEXP, a third-party delivery management platform, enabling administrators to manage deliveries, customers, riders, services, pricing, and tracking operations from a centralized panel.

TECHNICAL SKILLS

Programming Languages & Frameworks : JavaScript (ES6+), Java, HTML5, CSS3, React.js, Bootstrap, Tailwind CSS, Material UI

State Management: Redux (Basic Understanding)

Tools & Platforms: Git, GitHub, Linux, Vercel, Netlify, WordPress

Project & Workflow: Jira, Asana, Trello

Other Skills: Cross-browser compatibility, Performance optimization, Responsive design, Component-based architecture

EDUCATION

Indira Gandhi National Open University (IGNOU)

Expected: June 2026

Bachelor of Computer Applications

CERTIFICATIONS

DSA with Java – Apna College

- Completed a comprehensive course covering core data structures and algorithms in Java.
